

Green Screen Technology Across the Curriculum

Presented by Lindsay Moss, StarTime

In this hands-on program, teachers will collaborate through a number of movie-making tasks, both in front & behind the camera. From writing, rehearsing to crewing, edit...

Format: Face to Face - Individual

Audience: This workshop would suit all teachers from Pre-school to Year 12.

This promotes modern learning principles for the future focused curriculum.

Teachers wanting to be at the forefront of current technologies in their school would benefit from this highly engaging workshop. As the Digital Technology curriculum and ICT Capabilities become mandatory in 2017 now is the perfect time to upskill on current technologies

Description

Green screen movie making with iPads applies technology in the classroom creatively, in a way that engages students with content, develops literacy and improves learning outcomes. 21st century learning is at the heart of the movie making process and this 1 day program demystifies the process for any teacher interested in bringing multi-modal learning to their practice.

This is an interactive, hands-on program. Teachers will collaborate through a number of movie-making tasks, both in front and behind the camera. From writing, rehearsing to crewing, editing, watching and reviewing, in our mini-movie festival at the conclusion of the workshop.

Understanding how video can enhance your teaching and taking away practical tools for the classroom is the aim of this program. For those already applying technological strategies in the classroom, this course will enhance and develop your skills to the next level.

Sessions

Introduction

30 minutes

During the introduction, participants will learn how digital literacy and the integration of green screen technology film making can promote modern learning in a future focused curriculum.

Presenting to Camera

1 hour

During this session, participants learn the fundamental ideas of presenting to camera. Roles within a film crew are also explored and participants will have the opportunity to take on these roles when filming during this session.

Editing:

30 minutes

Participants will be shown how to edit with the iMovie app using the footage filmed in the previous session

Fundamentals of Green Screen Technology

2 hours

Intro Maker APP (Introduction creation technology)

Participants will be shown to set up the My School Studio. They will be taught the fundamental aspects of green screen technology and its importance in the classroom. Using the roles outlines in early sessions, participants will use green screen technology to create a short 2 minute film. Participants will be shown how to operate the Veescop App. After filming occurs participants then have the opportunity to edit their film.

Integration into the Curriculum

1 hour

After participating in the hands on sessions, participants will have the opportunity to reflect and discuss in an open forum on how green screen technology can redefine technology.

About the team

Lindsay Moss

Creator

Lindsay is the founder and director of StarTime Studios. He is currently undertaking a Master's in Screen Arts and Business at AFTRS, completing a thesis on how the movie making process develops collaborative skills in students. He has over 20 years working as a producer, director, actor and educator.

Lindsay has an unwavering enthusiasm and dedication to inspiring young people, creatively enhancing their learning and educational experiences. This passion is at the core of StarTime's vision, and has guided the company to become the industry leader in bringing green screen movie making programs into hundreds of classrooms, all across Australia.

StarTime

Creator

Digital movie making and digital literacy using iPads is a perfect vehicle to engage students in digital literacy skills for the 21st century. It develops communication (both in presenting and production), critical thinking and collaborative skills, and is - by its very nature - highly creative.

StarTime has created, shot and edited over 1000 films with children of all ages in its 10 years of production. With programs that are linked to the Australian Curriculum, the team have worked with over 10,000 students and teachers to ensure easy integration and implementation of digital technologies in the learning environment.

With the inclusion of affordable My School Studio green screen packages, film-making incursion programs and PD programs, StarTime continues to create and provide constantly evolving and relevant programs to ensure schools around Australia remain up to date with the very latest in 21st Century digital technology.
