Format: Masterclass

Audience: This course will be relevant to a wide range of professionals within the teaching community, from teachers (both primary and secondary) to principals/ deputies, and to school counsellors and support teachers.

Description

Are you worried about your students developing a problem with gaming or internet overuse in class or at home? Noticing their concentration wandering, or even their grades dropping? Then this is the course to assist you.

During this session I will outline the basic concepts and the historical development of the emerging phenomenon of 'problematic internet use' or PIU (often dubbed 'internet addiction'), and how a teacher or counsellor can recognise it in a student in any school-year. I will draw on both personal direct clinical experience, Australian research, and the wide international research. I will comprehensively but accessibly cover practical strategies in how to address an emerging problem in a specific student, as well as strategies to improve the 'digital diet' within the classroom and in the whole-school community. I will also delineate key mental-health referral and treatment pathways, when these are required in a worsening or entrenched situation.

Occurrences

There are no occurrences of this format in Australia (NSW) at this time.

Sessions

Live Presentation

2 hours

The entire course will be delivered as one live presentation.

About the team

Dr Philip Tam

Creator

Dr. Tam is a well-regarded child psychiatrist, researcher, presenter and writer. He is a national and global pioneer in the emerging and complex field of 'problematic internet use' (also known as internet addiction) in school-aged children, and regularly presents workshops and seminars on the topic to both general and professional (teaching and medical) audiences. He contributes regularly in the Media, and has written many articles and book chapters on this topic.
