

# Video Fundamentals for Teachers

## Presented by Dragon Education

We will go through the fundamental skills and techniques you need to make better looking and sounding videos and do it as efficiently as possible.

Format: 1. Face to Face

Audience: Any teacher who likes the idea of using video but has always found it a bit daunting or doesn't know where to start.

## Description

This course is an introduction for teachers into creating and using video as part of their teaching practice. If you have ever wanted to only use part of a video and put it in a PowerPoint, wanted to try flipped learning or wanted to show your students how to record an interview this one day workshop is for you. We will go through the fundamental skills and techniques you need to make better looking and sounding videos and do it as efficiently as possible.

### Additional notes about this format

**This course is available to attend in person or remotely. If you wish to attend this course via Zoom link, please enrol using the promo code REMOTE. This will reduce the price of the course by \$50. Zoom links will be emailed closer to the course date.**

**If you enrolled to attend the course in person and we need to change to a remote only course, you will be given a \$50 credit (valid for 12 months) .**

This workshop is very practical, in terms of in the way it is taught but also how you can use it in the classroom. The whole program is hands-on you will apply the information straight away using the latest equipment and software.

**2 hours**

Refining your shooting and editing and exporting your video files.  
Looking at where and why video can add value to teaching and learning experiences and how to plan for and incorporate it into lessons and assignments.

## About the team

### Dragon Education

#### Presenter

The team behind Dragon Education and Training have over twenty years of experience working with teachers, students, and schools to provide imaging solutions. Dragon Education and Training was created in response to the demands of teachers for whom the most valuable resource is knowledge. Teachers want to know how and why they want to understand and to use their understanding to help them deliver better outcomes for their students. Teachers also want to be engaged in order to feel that their professional learning is valuable to their school, their students, but most importantly to themselves. As available technologies continue to emerge and transform the way we do things, both in the classroom and in the real world, it is important to remember that knowing what the technologies are and how to use them is only a small piece of the puzzle; what is far more important is understanding why.

All of Dragon's courses and programs are developed and presented by teachers for teachers, and they aim to address both the how and the why in order to make your professional learning: Relevant, Accessible, Hands-On & Applicable
