Occurrences

There are no occurrences of this format in Australia (NSW - Accredited) at this time.

Sessions

Understanding Cameras and Setting for video

1 hour and 30 minutes

In this session, we look at the differences between smartphones DSLRs and Cinema Cameras and go through the settings that are ideal for shooting most videos content. we also look at the teacher's cameras and how to get the best results.

Understanding lighting

45 minutes

Look at how lighting affects your image and how to use it to get the emotion that wants. We look at the difference between the different types and what to consider when picking a light.

How to capture audio

30 minutes

We go through different microphones and how they work.
We record a scene with different model and listen to the differences.
This allows as to understand the choices we have and when to use each one.

Planning the Shoot

15 minutes

Now we go through the story for our short film and discuss how we will shoot it. The narrative will be given and but how it is shot is up to the teachers.

Lets start shooting our short film.

2 hours

Taken everything we have learnt we are now ready to start.

We will shoot a 6 scene short film in the studio and other available spaces (Carpark, Office, Showroom). We can select the camera, Lens, Lighting and audio. This will be done in small groups giving everyone a chance to play a part.

Editing Time

1 hour

We will edit as a group, going through the steps of using Adobe Premiere Rush. We will then talk about timing and creative choices we have when editing.

About the team

Dragon Education

Creator

The team behind Dragon Education and Training have over twenty years of experience working with teachers, students, and schools to provide imaging solutions. Dragon Education and Training was created in response to the demands of teachers for whom the most valuable resource is knowledge. Teachers want to know how and why they want to understand and to use their understanding to help them deliver better outcomes for their students. Teachers also want to be engaged in order to feel that their professional learning is valuable to their school, their students, but most importantly to themselves. As available technologies continue to emerge and transform the way we do things, both in the classroom and in the real world, it is important to remember that knowing what the technologies are and how to use them is only a small piece of the puzzle; what is far more important is understanding why.

All of Dragon's courses and programs are developed and presented by teachers for teachers, and they aim to address both the how and the why in order to make your professional learning: Relevant, Accessible, Hands-On & Applicable

Enrol now to secure your spot

Limited spots are available. Please enrol online or fax your enrolment to 1300 667 691 to secure your spot.
