

Learn Photoshop for Photographers with classroom exercises

Presented by Dragon Education

Learn Photoshop and get classroom projects so you can teach what you learnt. This amazing tool can be a little overwhelming. This course is designed to introduce you to...

Format: 1. Face to Face

Audience: Teachers wishing to teach photoshop in the classroom that needs an overview of how the program works. this course also includes classroom exercises the students can use to help reinforce the learning.

Description

This course is for beginners. You do not need any previous knowledge of Photoshop, photography or design. We will start right at the beginning and work our way through step by step. This is a course that teaches you how to edit your digital images and produce creative images. It is intended for photographers who wish to take the editing of their images to the next level using industry-standard software. Adobe Photoshop will be the photo editing software used in this course to editing original images and for producing creative effects to achieve maximum impact. Students will discover the scope of creative possibilities offered by Photoshop.

Additional notes about this format

This course is available to attend in person or remotely. If you wish to attend this course via Zoom link, please enrol using the promo code REMOTE. This will reduce the price of the course by \$50. Zoom links will be emailed closer to the course date.

If you enrolled to attend the course in person and we need to change to a remote only course, you will be given a \$50 credit (valid for 12 months) .

About the team

Dragon Education

Creator

The team behind Dragon Education and Training have over twenty years of experience working with teachers, students, and schools to provide imaging solutions. Dragon Education and Training was created in response to the demands of teachers for whom the most valuable resource is knowledge. Teachers want to know how and why they want to understand and to use their understanding to help them deliver better outcomes for their students. Teachers also want to be engaged in order to feel that their professional learning is valuable to their school, their students, but most importantly to themselves. As available technologies continue to emerge and transform the way we do things, both in the classroom and in the real world, it is important to remember that knowing what the technologies are and how to use them is only a small piece of the puzzle; what is far more important is understanding why.

All of Dragon's courses and programs are developed and presented by teachers for teachers, and they aim to address both the how and the why in order to make your professional learning: Relevant, Accessible, Hands-On & Applicable
